

Subject: Behavioral Scientist vacancy announcement in ORT/PRB open 9/1 - 9/15
Importance: High

Good morning,

The Operational Research Team (ORT), Prevention Research Branch (PRB), DHAP has a vacancy announcement for a Behavioral Scientist, GS-101-13, that opened today and closes September 15, 2009. Below is the description of major duties for the position:

The Operational Research Team (ORT) conducts behavioral and operational research to improve the efficiency, effectiveness and sustainability of evidence-based HIV prevention program activities and the dissemination, availability, accessibility and acceptability of programs and products used by HIV prevention providers and the communities they serve. The incumbent will develop new behavioral and operational research projects (e.g., a multi-site project to evaluate adapted behavioral interventions for high-risk groups). Based on the incumbent's knowledge of behavioral and social science theory (including the social, community, and structural factors that affect HIV risk), behavioral and social science research methods, and HIV intervention research, the incumbent will collaborate with other staff in ORT on research protocol development, human subjects issues, and project implementation and evaluation.

The incumbent will lead the management and analysis of large, complex qualitative and quantitative data sets from these research projects. The incumbent will prepare original scientific research papers.

Papers will be prepared for publication in peer-reviewed scientific journals. The incumbent will develop presentations for scientific conferences and meetings.
